Pune, Maharashtra — ganeshsonawane39773@gmail.com — +91 9373519234 — LinkedIn — GitHub

Summary

Final-year B.Tech Computer Engineering student (CGPA: 8.34, No Active Backlogs) with strong foundations in **Python, C++ , Java, and Node.js**. Experienced across the full **Software Development Lifecycle (SDLC)** – design, implementation, testing, and support. Skilled in **hybrid-cloud concepts, AI/ML workflows, and REST API integration**. Strong analytical problem-solver with effective communication skills, flexible to work from anywhere in India.

Technical Skills

Programming Languages: Python, C++ , C, Java, Node.js

Software Engineering: Object-Oriented Programming, Data Structures & Algorithms, REST APIs, SDLC, System Design

Backend Development: Flask, FastAPI, JSON APIs, Microservices

AI & Data Tools: NumPy, Pandas, Scikit-learn, TensorFlow, OpenCV

Cloud & DevOps: Docker, Git, MySQL, Oracle Cloud Infrastructure (OCI)

Education

B.Tech in Computer Engineering

Dr. Babasaheb Ambedkar Technological University

Aug 2022 – Aug 2025

CGPA: 8.34 / 10 | No Active Backlogs

Diploma in Computer Engineering

Shri Gulabrao Deokar Polytechnic, Jalgaon

Aug 2019 – Aug 2022

Percentage: 73%

Experience

AI/ML Developer Intern

Oct 2025 – Present

Blue Planet Info Solution Pvt. Ltd., Pune

- Developed backend modules using **Python and Flask**, participating in all SDLC phases – design, development, testing, and support.
- Built **data preprocessing pipelines** using Pandas and NumPy; analyzed failures and proposed improvements with technical leads.
- Collaborated with developers using **Git version control** for efficient code integration in an agile team environment.

Data Science & AI/ML Intern

Oct 2024 – Nov 2024

YBI Foundation

- Built ML models using **Scikit-learn** for classification tasks; applied feature engineering to improve model performance.
- Developed **REST APIs** to integrate ML models into scalable client-facing software applications.

Projects

AI Doctor Chatbot – LLM Integration

2025

- Integrated **GPT APIs** with a Flask backend using structured JSON pipelines, delivering a reliable AI-powered hybrid-cloud solution.

Wild Eye AI – Wildlife Detection System

2024 – 2025

- Built a computer vision system using **TensorFlow and OpenCV**, achieving **90%+ detection accuracy** through full SDLC execution.

AI-Powered Presentation Generator

2024

- Automated slide generation using **Python, GPT APIs, and python-pptx**, reducing preparation time by **80%** via AI-based automation.

Certifications

Oracle Cloud Infrastructure 2025 – Generative AI Professional

McKinsey Forward Program 2025

Linux & DevOps – Lernomates Technologies

Tata Data Visualisation: Empowering Business with Effective Insights
